Proffessional Summary

I am a UI developer with over 7 years of experience in the industry. I am passionate about learning new trends in the market. In my 7yrs of experience, my work majorly consists of analysis, evaluation and executing the design in projects using sound engineering principles and adhering to business standards, practices and project requirements. Convert and demonstrate new user experience from legacy UI code.

Technical Skills

Below are the tech stacks I have hands-on experience

µ-frontend, Semantic HTML, HTML5, CSS3, Sass, Core JavaScript, Es6, Progressive web app, React, React Native, Webpack,

Employment history

Sr. UI Developer, ThoughtWorks. Bangalore, KARNATAKA

Aug. 2013to Present

With in-house and client bound projects

- Proposed the pros & cons for various µ-frontend Architecture implementation in Angular 8 and implemented in the project.
- Designed a setup for the data-driven React application for a data-heavy project which allowed the clients to customise and add various fields without developer interference.
- Created a 2-level, unique & flexible variable override system via Sass for skinning the atomic UI elements. This allowed easy skinning for Trainline and their client's websites for quick .
- Architected similiar system of 2-level variable override system for a friend's resumehere
- Developed responsive emails templates using XSLT for new customer registration, booking confirmation emails etc.
- Architected a common platform to share UI component styles among 3 teams, using React and Angular frameworks.
- Architected and developed the front-end for the Cisco eReaderAndroidandiOSapps.
- Was one of the speaker forUnfold UIconference forCss grid
- Was one of the speaker for the workshop for "Progressive web app". We covered thefollowing topics
    - Promises
    - ServiceWorker
    - Cacheing patterns
    - Push Notification
    - Manifesting websites
- Developed a custom survey and sample distributionformusing Google App Script for our client, BJ's Wholesale. Was appreciated for coming up with a quick, efficient and cost-effective solution.
- ContributedtoGrommetan open-source React UI framework.

Few projects done during this time are:https://www.virgintrains.co.uk/,https://www.eastmidlandstrains.co.uk/,http://www.scotrail.co.uk/

UI Developer, Toboc International Pvt. Ltd.. Bangalore, KARNATAKA

Jul. 2012toAug. 2013

- Toboc

  My responsibility was maintenance of a B2B site. This is a B2B portal where buyers and sellers around the world participate for trading. Few of my work include:

  - Menu where you can go diagonally (out of a menu item straight into its sub menu) without closing the menu.
  - Integration of the callback menu.
  - Sprite gallery.
- Toboc Deals

  This is a sister website for the above website. This is a website for people in Bangalore for deals to travel addicts and nature explorer. My role included interacting with owners, understanding the patterns and consulting them for better profits.

UI Developer, Freelancer.

Jan. 2010–Jul. 2012

During my Freelancing, majority of the work was around creating htmls from static psds. My work would brief in:

- Slight modifications in PSDs and extracting resources (slicing)
- Creating sprites out of the images / icons.
- Browser compatibility.
- Using jQuery for interactions.
- Creating plugins if required.
