💼 Employment history

UI Developer Lead Consultant, ThoughtWorks. Bangalore, KARNATAKA

Aug. 2013 to Present

- Proposed the pros & cons for various µ-frontend Architecture implementations in Angular 8 and implemented in the project.
- Designed a setup for the data-driven React application for a data-heavy project which allowed the clients to customise and add various fields without developer interference.
- Created a 2-level flexible variable override system using Sass & atomic design principles for creating over 10 skins for various train-operating company websites in the U.K.
  - Architected a similar system for a colleague's website. here
- Developed responsive email templates using XSLT for new customer registration, booking confirmation emails etc.
- Designed a common platform to share UI component styles among 3 teams, using React and Angular frameworks.
- Architected and developed the front-end for the Cisco eReader Android and iOS apps.
- Was one of the speakers for Unfold UI conference for CSS grid
- Was one of the speaker for the workshop for "Progressive web app". We covered the following topics
  - Promises
  - ServiceWorker
  - Caching patterns
  - Push Notification
  - Manifesting websites
- Developed a custom survey and sample distribution form using Google App Script for our client, BJ's Wholesale. Was appreciated for coming up with a quick, efficient and cost-effective solution.
- Contributed to Grommet, an open-source React UI framework.

Few projects done during this time are: https://www.virgintrains.co.uk/, https://www.eastmidlandstrains.co.uk/, http://www.scotrail.co.uk/

UI Developer, Toboc International Pvt. Ltd. Bangalore, KARNATAKA

Jul. 2012toAug. 2013

- Toboc

  My responsibility was the maintenance of a B2B site. This is a B2B portal where buyers and sellers around the world participate in trading. Few of my work include:
  - Menu where you can go diagonally (out of a menu item straight into its sub-menu) without closing the menu.

- Integration of the callback menu.
- Sprite gallery.
- **Toboc Deals**

  This is a sister website for the above website. This is a website for people in Bangalore for deals to travel addicts and nature explorers. My role included interacting with owners, understanding the patterns and consulting them for better profits.

UI Developer, Freelancer.

Jan. 2010–Jul. 2012

During my Freelancing, the majority of the work was around creating HTML from static PSDs. My work would brief in:

- Slight modifications in PSDs and extracting resources (slicing)
- Creating sprites out of the images/icons.
- Browser compatibility.
- Using jQuery for interactions.
- Creating plugins if required.
